Onderwerp: EAIC: Clean Technology Innovation Initiative Online Workshop on 22 September 2021

Bijlagen: Clean Technology Innovation Initiative Online Workshop Agenda 2021_09_03.pdf

Dear EAIC Members,
On behalf of Marek Wilgos (PCA), please find below other relevant information on environmental activities.
Best regards.
Frédérique

We are contacting you about the forthcoming **Clean Technology Innovation Initiative Online Workshop which will take place on 22 September from 10:00 to 11:30 Eastern Time (North America)**.

The goal of the new Clean Technology Innovation Initiative is to improve understanding and mobilize knowledge directed at the development and deployment of innovative clean technologies, and the effective use of standardization as part of this process. The Initiative aims to establish a publicly-accessible, web-based collaborative

mechanism to capture current practice, state-of-the-art knowledge and stakeholder understanding on emerging technologies.

Specific objectives of the 90-minute Workshop on 22 September are to:

- Increase awareness and understanding regarding the role of standardization in supporting global sustainability
- Present how 'cross-cutting' ISO environmental standards are relevant to global challenges and opportunities
- Introduce the basic elements of an integrative relationship map can be used to help visualize how global sustainability goals and international standards interact and relate.

Please have a look at the attached Workshop agenda. Should you be interested in joining us, please register using the link provided on the agenda.

Also, please note that you will be able to download Workshop presentation materials from the VerifiGlobal website the day following the workshop at: <https://www.verifiglobal.com/en>

Best regards

Marek Wilgos
